Product Description

DESCRIPTION

The GD35 manual packaging machine does not require fasteners and adopts a yin and yang buckle design, which is super strong and firm, making the interface bearing force close to that of the steel strip, and the interface is beautiful and reliable.

Strong tensile force, special structural design, easy to achieve binding and packaging of materials such as steel, aluminum ingots, and heavy packaging.

The machine has high durability, and all body and structural components are made of high-strength alloy materials, high reliability design, and advanced manufacturing technology.

Safe to use, fatigue free design. The shell is designed with explosion-proof plastic shell, providing protection and dust prevention, making it safer to use!
