

Hot Dip Galvanized Stainless Steel Strapping Seals metal poly seals Open Type

Our Product Introduction

for more products please visit us on setuopack.com

Basic Information

- Place of Origin: China
- Brand Name: Zhuoyu
- Certification: CE
- Model Number: M1.0*32*50Z
- Minimum Order Quantity: 23kg
- Price: To be discussed
- Delivery Time: 10-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100+box+10days

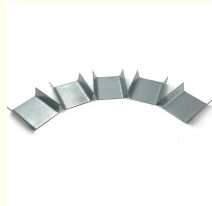

Product Specification

- Length: 50mm
- Width: 32mm
- Thickness: 1.0mm
- Lock Buckle Strength: Rm400MPA
- Surface: Hot Dip Galvanizing
- Weight: 23.5kg
- Highlight: Galvanized stainless steel strapping seals, Poly stainless steel strapping seals, Galvanized metal poly seals

Product Description

Hot dip galvanized locking buckle

Packaging buckle is a product widely used in packaging, logistics, manufacturing and other industries. It is mainly used to fix and tighten steel belts, or other types of packing belts, thus ensuring the stability and safety of goods during transportation and storage. Packaging buckle with high connection strength and impact resistance, usually made of high-strength material, so that it can withstand large tensile and impact force, not easy to break or deformation.

After the entire packing process is completed, the packing buckle and the steel belt will together form a strong packaging structure to ensure the stability of the goods during transportation and storage. The packaging buckle is treated with hot-dip galvanizing on the surface, which can enhance its surface hardness and wear resistance, thereby extending its service life. At the same time, its strength reaches Rm400MPa, demonstrating extremely high tensile strength and impact resistance, ensuring that it can withstand large external forces during the packaging process without being easily damaged.

When paired with 32mm wide baking blue and painted steel strips, it can be suitable for pneumatic packaging machines. When used in conjunction with pneumatic packaging machines, this type of packaging buckle can achieve fast and reliable packaging operations.

When using a 32mm wide hot-dip galvanized steel strip, it can be suitable for manual packaging machines, which can save effort.

length	50mm
