Product Description

Handheld intelligent inkjet printer

We are proud to introduce this handheld intelligent inkjet printer, a set of high efficiency, flexibility and intelligence in one of the automatic small coding equipment. It not only supports handwriting input, but also integrates multi-language selection function, so that your product logo is more international and personalized.

In terms of printing accuracy, this handheld intelligent inkjet printer also performs well. It uses a high-definition resolution of 600DPI, ensuring that each printing can present detailed, clear images and text. Even in small text or patterns, it can be perfectly presented, so that your product logo is more refined and professional.

In the printing effect, this handheld intelligent inkjet printer is first-class. It uses advanced printing technology, can easily cope with carton, metal, plastic, wood, glass and other materials, spray printed text or pattern clear, beautiful and lasting. At the same time, the number of printing lines can be freely adjusted between 1-6 lines to meet the identification needs of different products, so that your products are more eye-catching and unique.

Counting sequence number function is another major feature of this handheld intelligent inkjet printer. It supports 1-9 digit serial number variable, making your product identification more traceable. Whether it is production batches, factory dates or other key information, it can be printed on the product for easy product management and traceability.

In addition, the handheld intelligent printer is also equipped with a variety of external interfaces, including USB interface, charging port and photoelectric port. These interfaces not only make the device easier to connect and operate, but also give you more possibilities for expansion. You can easily connect the device to a computer or other device for data transfer, device charging, or interworking with other devices.

In short, this handheld intelligent inkjet printer with its high efficiency, flexibility, intelligence and excellent printing effect, has become a high-profile star product on the market. Choose it to make your production more efficient and convenient, while improving the quality and competitiveness of your products.
