

MH-TDM-91 Intelligent Double Motor Full Semi-Automatic Hot Melt Carton Strapping Machine

Our Product Introduction

for more products please visit us on setuopack.com

Basic Information

- Place of Origin: China
- Brand Name: Zhuoyu
- Certification: CE
- Model Number: MH-TDM-91
- Minimum Order Quantity: 1 stage
- Price: To be discussed
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 box per 10days

Product Specification

- Power: AC100-220V 50/60Hz 0.25kW
- Packing Speed: 3 Seconds/strap
- Tension Range: 5-50kg
- Workingtable Height: 750mm
- Applicable Straps Type: PP Strap
- Pp Strap Specification: Width 6~15mm,thickness 0.5-0.85mm
- PP Strap Spool: Inner Dia.160-190mm Outer Dia.200-210mm
- Machine Dimension: L785mmxW545mmxH750mm
- Highlight: Intelligent Carton Strapping Machine, Full Semi-Automatic Carton Strapping Machine, Double Motor Carton Strapping Machine

Product Description

Semi-automatic baler

The semi-automatic strapping machine is an efficient, stable and easy to operate packaging equipment, specially designed to meet the diverse packaging needs. This machine is widely used in PP packing belt, its width range covers 6mm to 15mm, the thickness is between 0.5mm and 0.85mm, this wide compatibility provides users with a great choice of space, to ensure that it can meet the packaging needs of different industries and different items.

In terms of strapping speed, the semi-automatic strapping machine performs particularly well, with each strapping process taking only 3 seconds to complete, which greatly improves work efficiency and reduces waiting time, especially for scenarios where a large number of packing tasks need to be processed quickly.

The operation interface design is simple and clear, the button layout on the simple operation panel is reasonable, and the function logo is clear and easy to understand, so that users can easily get started without complicated training. This user-friendly design not only reduces the difficulty of operation, but also improves the accuracy and stability of packaging operations.

The binding force of the machine is strong, and it can be flexibly adjusted between 5kg and 50kg according to actual needs, to ensure the packing effect is firm and reliable. At the same time, the worktop height is designed to be 750mm, which conforms to the ergonomic principle, so that the user can maintain a comfortable posture during the operation and reduce fatigue.

The semi-automatic strapping machine has a wide range of applications, which is not only suitable for the fixation and protection of items in storage management, but also for the food packaging industry to ensure the hygiene and safety of food. In addition, in the field of logistics and transportation, it plays an important role in helping logistics enterprises to quickly and accurately complete the packaging and fixing of goods, improve transportation efficiency, and reduce the risk of damage to goods.

In short, this semi-automatic strapping machine with its high efficiency, stability, easy operation and a wide range of applications, etc., has become the ideal choice for packaging operations in many industries. Both large enterprises and small
