

Precise Tension Control System For Better Packaging Results With Electric Strapping Tool

Our Product Introduction

for more products please visit us on setuopack.com

Basic Information

- Place of Origin: China
- Brand Name: Zhuoyu
- Certification: CE
- Model Number: GSE/DYB32
- Minimum Order Quantity: 1 stage
- Price: To be discussed
- Packaging Details: 49*44*16cm
- Delivery Time: 10-15 work days
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,MoneyGram
- Supply Ability: 100+box+10days

Product Specification

- Applicable Strapping Tape Width: 32mm
- Applicable Strapping Tape Thickness: 0.8-1.2mm
- Applicable Straps Type: Steel Strip
- Tension Force: 6000
- Battery Capacity: 4.0Ah
- Charging Time: 50-60 Minutes
- Net Weight(N.W.): 7.54kg
- Package Size: 434*113*108mm
- Highlight: Electric Strapping Tool, Better Packaging Results Electric Strapping Tool

Product Description

Electric split steel belt baler

The electric split steel belt baler is an efficient and convenient tool designed for modern industrial packaging needs. This machine, with its unique split design, powerful packaging performance and flexible operation, has become a useful assistant in the packaging process of many enterprises.

The baler is composed of two parts, a locking device and a tensioning device, which are independent and closely coordinated to complete the locking and tensioning work of the steel belt. The locking device adopts an advanced mechanical structure, which can easily cope with steel belts of various specifications and materials, ensuring that the locking is firm and not easy to fall off. At the same time, its internal wear-resistant material design greatly extends the service life of the locking device.

The tension device is another highlight of this baler. It uses an electric drive, which can quickly tighten the steel belt to a predetermined tension and automatically complete the locking action. This design not only improves the packaging efficiency, but also greatly reduces the labor intensity of the operator. In addition, the tensioning device is also equipped with a precise tension control system, which can be flexibly adjusted according to different packaging requirements to ensure better packaging results.

In order to meet the packaging needs of different industries, this electric split steel belt baler is also specially designed with a variety of specifications of adapters and accessories. These accessories can be adapted to a variety of steel belts with widths between 19-32mm and thicknesses between 0.5-1.2mm, making this baler widely used in steel, wood, logistics and other fields. Whether it is the fixation of large heavy items or the packaging of small precision parts, this baler provides a stable and reliable solution.

In addition to excellent packing performance, this electric split steel strip baler offers excellent portability and

Our Product Introduction

durability. Its compact structure and light weight make it easy for operators to carry it to different work locations for packing operations. At the same time, the equipment uses high-quality parts and materials, and goes through strict manufacturing process and quality testing to ensure that it can maintain stable performance and good durability during long-term use.

In terms of battery life, the baler is equipped with a high-performance lithium battery pack that supports continuous operation for long periods of time without frequent charging. In addition, the battery pack also has a fast charging function, which greatly reduces the charging time and improves the work efficiency.

We know the importance of after-sales service, so we pay special attention to providing customers with timely and professional technical support and repair services. No matter you encounter any problems in the use process or need to consult related matters, we will solve and reply for you as soon as possible.

To sum up, the electric split steel belt baler has become a leader in the field of modern industrial packaging with its unique split design, powerful packaging performance, flexible operation, and excellent portability and durability. If you are looking for an efficient and reliable baler, consider this electric split steel belt baler.

Model number	GSE/DYB32
width	32mm
Thickness	0.8-1.2mm
Appcable Straps Type	Steel strip
Tension force	6000
Battery Capacity	4.0Ah
Charging time	50-60 Minutes
Net weight (n.w.)	7.54kg
