Basic Information

- Place of Origin: China
- Brand Name: Zhuoyu
- Certification: CE
- Model Number: ZYQ -16
- Minimum Order Quantity: 1 stage
- Price: To be discussed
- Packaging Details: 44.5*28.5*18.5cm
- Delivery Time: 10-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100+box+10days

Product Specification

- Width: 13-16mm
- Thickness: 0.4-1.2mm
- Applicable Straps Type: PET、PP
- Speed: 100-200mm/s
- Strapping Force: 400-3200N
- Voltage: 14.4V
- Capacity: 4.0Ah
- Weight: 2.9kg
- Highlight: Manual Electric Baler, Fully Automatic Electric Baler, One Click Electric Baler

Product Description

One click electric packaging machine

The one-click electric baler is the right-hand man of the modern packaging and logistics industry, and has won wide recognition for its excellent performance and convenient operation.

First of all, this baler uses an ultra-light body design, the whole machine weight is only 2.9kg, so that the operator can easily move and carry, greatly improving the work efficiency. Whether you are operating in a small space or need to carry long distances, you can easily cope.

In terms of packaging belts, this machine can be perfectly adapted to PET and PP two kinds of packaging belts, the width range between 13-16mm, the thickness of up to 0.4-1.2mm. This broad compatibility allows it to respond to a wide range of different types of packing needs, providing a solid packing effect for items of different sizes and weights.

Tension force is an important index to measure the performance of baler. This one-button electric baler offers an adjustable tension of 400-3200N, which can be flexibly set according to actual needs. The strong tension not only ensures the firmness of the packaging, but also improves the aesthetics of the packaging, making the packaged items more uniform.

In terms of battery life, the machine is equipped with 4000mAh large-capacity battery, charging time only 90 minutes, can be fully charged and last 600 packing belts. This efficient endurance ensures the stability of the baler during long periods of operation and reduces interruptions caused by insufficient power.

On the operation interface, the one-button electric baler adopts the CNC panel design, which makes the operation more simple and intuitive. At the same time, it also provides manual, semi-automatic and fully

Our Product Introduction

automatic three modes for users to choose from, which can be flexibly switched according to different packaging needs. This design not only improves the flexibility of operation, but also satisfies the usage habits of different users.

In addition, this baler also has a wide range of applications. Whether it is product packaging in manufacturing, cargo fixing in logistics, or packaging needs in other industries such as agriculture and construction, it provides efficient and reliable solutions.

To sum up, the one-click electric baler has become an indispensable tool in the modern packaging and logistics industry with its lightweight body, wide compatibility, strong tension, durable battery life, flexible operation mode and a wide range of application fields.
