

## Stable Manual Strapping Tools For Plastic Tape Strong Bite Force And Versatile Usage

Our Product Introduction

for more products please visit us on [setupack.com](http://setupack.com)

### Basic Information

- Place of Origin: China
- Brand Name: Zhuoyu
- Certification: CE
- Model Number: J19
- Minimum Order Quantity: 1 set
- Price: To be discussed
- Packaging Details: 52.5\*14\*5CM
- Delivery Time: 10-15 work days
- Payment Terms: L/C,D/A,D/P,T/T, Western Union, MoneyGram
- Supply Ability: 100+box+10days

### Product Specification

- Model: J19
- Strip Width: 16-19mm
- Color: Yellow
- Total Weight: 2kg
- Highlight: Plastic Tape Manual Strapping Tools, Strong Bite Force Manual Strapping Tools, Versatile Usage Manual Strapping Tools

### Product Description

#### Clamp pliers

Our manual plastic tape clamp is specially tailored for 16-19mm wide plastic tape, and its excellent performance makes it a useful aid for all kinds of packaging and strapping work.

The bite force of this clamp is exceptional. Its internal structure is precise, and the biting teeth made of high-strength materials can instantly tighten the plastic steel belt during operation, producing a strong and stable biting force. Just a simple clip, the plastic steel belt will be firmly fixed, there will be no loosening or slipping, greatly improving the packaging effect, to ensure that the bundled items in the transport, storage process safe and stable. Such a strong bite force not only makes the strapping stronger, but also greatly saves manpower and time. Without repeated operation, one clamping can achieve the ideal effect, significantly improve work efficiency and reduce labor intensity.

Manual plastic steel belt clamps are very versatile. In the steel industry, in the face of thick and heavy steel, it can rely on strong biting force to firmly fix the plastic steel belt to ensure that the steel is not loose during lifting and transportation; In aluminum processing enterprises, for aluminum whose surface is easy to scratch, the clamp can not only firmly fix the plastic steel belt, but also avoid damaging the aluminum surface to ensure product quality; In the cotton mill, the fluffy cotton bales become compact and orderly after being tied with the clamp and the plastic steel belt, which is easy to handle and store.

It is worth mentioning that it is usually used in conjunction with the same series of tools to form an efficient packaging system. Whether it's the toughness of steel, the elegance of aluminum, or the fluffiness of cotton, our manual plastic steel belt clamps are easy to handle, making them the best choice for quality, efficient packaging in any industry.

Strip width	16-19mm
Applicable straps Type	PET strap
