Product Description

KF7001 manual baler

The KF7001 clamp is a quality tool designed specifically for efficient packaging with a wide range of applications and can easily handle PP packing tape 12-16mm wide and 0.5-1.5mm thick. Whether it's a lightweight packing strap for small items or a thicker strap for large weights, this kit gets the job done. Easy operation is one of the highlights of the KF7001. Even first-time users can easily learn how to use it in a short time. If you are confused about the operation, we can also provide detailed operation tutorial videos, through intuitive demonstrations, so that you can quickly master the use of skills, easy to start the efficient packaging journey. The tensioner and clamp are used together to produce a strong synergistic effect. The tensioner can quickly and stably tighten the packing belt to ensure that the goods are tightly bound; The clamp is responsible for firmly fixing the packing belt to prevent loosening, and the two work closely together to greatly improve the efficiency and quality of packing. In many industries, KF7001 has excellent performance. In the paper industry, it facilitates the fast packaging and finishing of paper rolls; Aluminum, steel industry, reliable binding of metal materials to ensure transportation safety; In cotton mill, efficient packing of cotton bags to improve work efficiency; In the field of logistics, it has become the right-hand man for rapid packaging of goods. Regardless of the industry, the KF7001 tensioner and clamp can provide strong support for your packaging work, and is the best choice for increasing packaging efficiency. By choosing KF7001, you are choosing a convenient and efficient packaging solution.

Model	KF7001
Breadth	12-16mm
