Product Description

AIR SPRAY GU

This spray gun is renowned for its precision and efficiency, making it an ideal choice for professional spraying operations. Its 1.4mm fine nozzle can achieve fine and uniform coating output. Whether it is for drawing complex patterns or large-scale spraying, it can handle it with ease, ensuring that every spray is precise and in place. The working pressure is flexibly adjustable between 2.0 and 3.5bar. It can be easily adjusted to the optimal pressure value according to the characteristics of different coatings and spraying requirements, thereby ensuring the stability of the spraying effect. The wide range setting of the pattern width from 180 to 255mm not only meets the requirements of small area detail processing but also is competent for large area rapid coverage, adapting to diverse working scenarios. The 600ml large-capacity paint tank reduces the trouble of frequent material addition and improves work efficiency. The spray gun is made of high-quality materials, with a sturdy and durable structure. It can withstand long-term and high-intensity use. Even in harsh working environments, it can operate stably, reducing equipment wear and maintenance costs. It is particularly worth mentioning its highly efficient atomization technology, which can fully atomize the paint into fine particles. This not only makes the coating more uniform and smooth but also effectively reduces paint waste and saves costs. Whether it's car painting, furniture coating, or artistic creation, this spray gun can bring you a high-quality spraying experience with its outstanding performance.
