Product Description

K1 Electric packaging machine

This electric strapping machine is an efficient and convenient strapping tool, specially designed for PP and PET strapping bands. It is suitable for strapping bands with a width of 13-16mm and a thickness of 0.6-1.2mm, and can meet the strapping needs of different industries. Its powerful performance and flexible operability make it an ideal choice for industries such as brick factories, aluminum factories, steel factories, and cotton mills.

High-performance battery, long-lasting power

The device is equipped with a 4000mAh large-capacity lithium battery. A single charge can complete the binding of approximately 300 strapping bands, significantly enhancing work efficiency and reducing the hassle of frequent charging. It is particularly suitable for high-intensity and long-duration working environments.

Intelligent adjustment, stable binding

The binding force can be freely adjusted within the range of 400 to 3200N to meet the packaging requirements of different items. Whether it is light materials or heavy goods, it can ensure a firm binding and avoid loosening problems during transportation.

Efficient tensioning and quick completion

The tensioning speed reaches 100-200mm/S, with quick and smooth operation, significantly enhancing packaging efficiency. It is particularly suitable for assembly line operations or large-scale strapping scenarios, helping users save time and labor costs.

Our Product Introduction

It is fully equipped and ready to use immediately after purchase
The product comes with an instruction manual, a tool kit, a certificate of conformity and a charger. It can be used right out of the box without the need to purchase additional accessories, making it convenient for users to quickly get started and easily complete various strapping tasks.

It is widely applied and adaptable to various industries
This product has a wide range of applications and is suitable for packaging various materials such as bricks, aluminum, steel, and textiles. It meets the needs of different scenarios such as factories, warehouses, and logistics, and is an excellent tool for improving strapping efficiency and reducing labor intensity.

This electric strapping machine combines high efficiency, durability and convenience.
It is a powerful assistant for modern strapping operations, helping enterprises enhance production efficiency and reduce operating costs.
