Product Description

K1 Electric packaging machine

This electric strapping machine is a professional-level strapping tool, specially optimized for PP and PET strapping bands. It is suitable for strapping bands with a width of 13-16mm and a thickness of 0.6-1.2mm, and is widely used in logistics, building materials, textiles, metal processing and other industries. Whether it is bricks, aluminium materials, steel, cotton textiles, cartons, etc., they can all be quickly and firmly bound, improving work efficiency and reducing labor costs.

ultra long range, durable
It is equipped with a 4000mAh high-performance lithium battery, which can complete approximately 300 bundling operations on a single charge, meeting the demands of high-intensity work and avoiding the trouble of frequent charging.

Smart adjustment, precise bundling
The binding force can be freely adjusted within the range of 400 to 3200N, easily handling goods of different weights and materials, ensuring that the binding is tight and not loose, and making transportation safer.

High speed tensioning doubles efficiency
The tensioning speed can reach up to 100-200mm/s, with quick and smooth operation, significantly enhancing the packaging speed. It is particularly suitable for assembly line operations and large-scale strapping needs.

Humanized design, easy to operate

Our Product Introduction

The whole machine is lightweight and portable, ergonomically designed, and does not cause fatigue even after long-term use. Equipped with an intelligent control system and one-click operation, even beginners can quickly get started.

Full set of accessories, ready to use
The box comes with an instruction manual, a tool kit, a certificate of conformity and a charger.

There is no need to purchase them separately. You can start working immediately after opening the box, saving time and effort.
