Product Description

MR19 Pneumatic baler

1 Light and flexible

The whole machine is designed to be lightweight, weighing only 2.9kg, and can be carried around with one hand. The compact body can easily handle operations in narrow spaces, and it is extremely convenient to move and pack.

2 Double solder joint reinforcement

Exclusive 20mm double weld point fusion technology ensures the packing strap is firmly locked. Specifically for fluffy goods like cotton and chemical fibers, no matter how you shake them, they won't fall apart.

3 Foolproof operation

Supports both handheld and hanging modes, allowing you to use it whether standing or sitting. Pneumatic drive saves 70% of the effort and is also easy for female workers to operate. Complete the packaging in three steps:

Adjust the welding time as needed (turn the knob clockwise, it is recommended to be 1-2.5 seconds).

Set the cooling time (rotate clockwise, usually 2 to 4 seconds)

Applicable scenarios:

- ✓ Cotton storage and strapping
- ✓ Chemical fiber raw material packaging
- ✓ Light and bulky goods circulation

Air Pressure	0.5-0.8Mpa
