Product Description

Electric strapping machine

This electric strapping machine is an ideal choice for efficient strapping operations, and with its powerful performance, it is suitable for the needs of multiple industries. Its tensile force range can be flexibly adjusted between 600 and 3200N. Whether it is light parcels or heavy goods, it can achieve precise fastening, ensuring that the goods remain stable and undamaged during transportation.

The equipment is specially designed for PET and PP strapping bands with a width of 13-16mm. It has strong compatibility and can handle strapping bands of different materials without frequent replacement of parts, significantly improving work efficiency. It is equipped with a 4000mAh large-capacity battery, providing long-lasting power and meeting the requirements of long-term continuous operation. It bids farewell to the physical exertion and low efficiency of traditional manual strapping machines.

The charging is convenient and efficient, taking only 90 to 120 minutes to complete the charging process, keeping the device on standby at all times. It is widely applicable to multiple industries such as brick factories, aluminum processing, cotton mills, logistics and warehousing, etc. Whether it is heavy building materials bundling or centralized packaging of textiles and logistics parcels, it can handle it with ease.

To ensure a good user experience, a complete set of accessories and a detailed manual will be given as a gift upon placing an order. You can put it into use quickly.
