Product Description

Electric strapping machine

Say goodbye to the cumbersome and laborious packaging process. This electric strapping machine brings a new, convenient and efficient strapping experience to various industries. It has an adjustable tensile force ranging from 600 to 3200N. With just a light press, the force can be precisely controlled according to the requirements of the goods. From light and thin cotton products to heavy aluminum materials and bricks, it can firmly bind them, preventing loosening and scattering during transportation.

For PET and PP strapping bands with a width of 13-16mm, it demonstrates excellent adaptability, eliminating the need to frequently adjust the equipment for changing different strapping bands and significantly reducing operational troubles. With a battery capacity of 4000mAh, it can be called a "battery life expert". Even after a whole day of packing work, the battery still has sufficient power. Even if the battery runs out, a quick charge of 90 to 120 minutes can quickly "fully recharge" it, without delaying the production progress.

In the brick factory, it can easily handle the bundling of stacks of bricks. In the aluminium workshop, long aluminium strips can be firmly fixed. In cotton mills, textiles that can be efficiently processed into bales; In the logistics warehouse, it is a capable assistant for packaging all kinds of parcels. Place an order now and in addition to the machine itself, you will also receive the matching accessories and a detailed manual. Even beginners can quickly get started, making the packaging
